Ohio State University Libraries

PERGAMON

AIMS AND SCOPE

Library Acquisitions: Practice and Theory provides a forum for the exchange of ideas and experiences among members of the library acquisitions, collection management, and bookselling communities throughout the world. It is a comprehensive publication designed to bring together many of the specializations within the broad areas of library acquisitions and collection management, including, but by no means limited to, books and serials in academic, public, school, and special libraries; government publications; gifts and exchanges; microforms and other nonprint media, such as videodiscs and computer software; and pertinent library automation projects. In reflecting the broad practical and theoretical foundations of the discipline, *LAPT* presents on-the-job experiences of librarians and booksellers as well as reports of empirical research and theoretical papers.

Journal of Government Information

(formerly GOVERNMENT PUBLICATIONS REVIEW)

An International Journal of Issues and Information Resources

Editor-in-Chief: **Steven D. Zink**, University of Nevada, MS322, Reno, NV 89557, USA
Internet: stevenz@unr.edu; BITnet: stevenz@equinox

In order to more accurately reflect the aims and scope, this journal will feature the above new title as of Volume 21, 1994. **Journal of Government Information** provides a forum for reviews, analyses, and news of government information programs and policies important to all fields and disciplines. The Journal provides in-depth coverage of the production, distribution, library handling, bibliographic control, accessibility and use of government information in all formats and at all levels of government—federal, state and province, municipal, national, United Nations and international agencies.

Special features include:

Notable documents issue: One issue per year is devoted to reviewing notable documents as an alerting service to readers to identify and obtain significant new official publications.

Recent literature on Government Information: A comprehensive listing of literature compiled twice a year.

Interviews, Viewpoints, and Reviews of monographs, documents and databases

RECENT ARTICLES

L.M. BRANSCOMB, U.S. scientific and technical information policy in the context of a diffusion-oriented national technology policy.

P.P. MASSA, Disseminating government information: Appropriate roles for the government and the private sector.

H. BURKERT, The legal framework of public sector information: Recent legal policy developments in the EC.

B. MORTON & S.D. ZINK, The dissemination and accessibility of Canadian government information.

B. KAHIN, Information policy and the Internet: Toward a public information infrastructure in the United States.

INFORMATION SYSTEMS

Databases: Their Creation, Management and Utilization

An International Journal

European Editor: **Matthias Jarke**, *RWTH-Aachen, Germany*
US Editor: **Dennis Shasha**, *New York University, New York, USA*

(00236)
Subscription Rate 1994: Volume 19 (8 issues) **£436.00 (US$670.00)**
ISSN 0306-4379

Audience: Researchers and Practitioners involved in information systems, in particular the management of databases, information retrieval and programming languages.

AIMS AND SCOPE
Information systems are the software and hardware systems that support data-intensive applications. *Information Systems* publishes articles concerning the design and implementation of languages, data models, software and hardware for information systems. Subject areas include data management issues as presented in the principal international database conferences (eg ACM SIGMOD, ACM PODS, VLDB and EDBT) as well as data-related issues from the fields of knowledge-based systems, information retrieval, programming languages, and organizational behavior. We seek papers that improve on, and are aware of, the best industrial practice and the best academic research. The style should be clear, direct, active and even occasionally amusing. The English should be fluent. Submitted papers should motivate the problems they address with compelling examples from real or potential applications. Systems papers must be serious about experimentation either on real systems or simulations based on traces from real systems. Papers from industrial organizations that discuss the practical implementation of systems are welcome. Theoretical papers should have a clear motivation from applications. They should either break significant new ground or unify and extend existing algorithms. Such papers should clearly state which ideas have potentially wide applicability. In addition to publishing submitted articles, the Editors-in-Chief will invite retrospective articles that describe significant projects by the principal architects of those projects. Authors of such articles should write in the first person, tracing the social as well as technical history of their projects, describing the evolution of ideas, mistakes made, and reality tests. Technical results should be explained in a uniform notation with the emphasis on clarity and on ideas that may have applications outside of the environment of that research. Particularly complex details may be summarized with references to previously published papers. The IBM articles about System R constitute one example. *Information Systems* is establishing a firm association with leading European database conferences, in particular the bi-annual EDBT conference, and will contribute to the broader dissemination of outstanding results through occasional special issues based on expanded versions of selected papers from such conferences.

A Selection of Papers
G. WEIKUM, C. HASSE, A. MOENKEBERG, P. ZABBACK (Switzerland), The COMFORT automatic tuning project.
R. LANZELOTTE, P. VALDURIEZ (France), Industrial-strength parallel query optimization: issues and lessons.

INFORMATION FOR CONTRIBUTORS

AIMS AND SCOPE

Library Acquisitions: Practice and Theory provides a forum for the exchange of ideas and experiences among members of the library acquisitions, collection management, and bookselling communities throughout the world. It is a comprehensive publication designed to bring together many of the specializations within the broad areas of library acquisitions and collection management, including, but by no means limited to, books and serials in academic, public, school, and special libraries; government publications; gifts and exchanges; microforms and other nonprint media, such as videodiscs and computer software; and pertinent library automation projects. In reflecting the broad practical and theoretical foundations of the discipline, *LAPT* presents on-the-job experiences of librarians and booksellers as well as reports of empirical research and theoretical papers.

EDITORIAL POLICY

The editors will be pleased to receive contributions from all parts of the world. Criteria for acceptance will be appropriateness to the field of the journal as described in the AIMS AND SCOPE, taking into account the merit of content and presentation. Only papers not previously published will be accepted, and authors must agree not to publish elsewhere a paper submitted to, and accepted by, the journal. One set of galley proofs will be sent to authors for correcting any omissions or errors, after comparing with the original manuscript. Substantial alterations are not permitted. Twenty-five reprints of each paper will be provided to the first-named author free of charge. Additional reprints may be ordered directly from Elsevier Science.

The Book Review Editor assigns and solicits book reviews. Book reviews will constitute critical appraisals of important publications.

Letters to the Editor should not exceed 400 words in length and may be: (a) comments or criticisms of articles recently published in the journal; (b) preliminary announcements of original work of importance warranting immediate publication.

Manuscripts for publication should be sent to the Editor-in-Chief: Carol Pitts Hawks, Head, Acquisition Department, Ohio State University Libraries, 2129 Sandston Road, Columbus, OH 43220.

MANUSCRIPT REQUIREMENTS

1. Submission: Submit the original typed copy, plus two other copies of the manuscript, typed DOUBLE-SPACED throughout, including tables, legends, and citations, on one side only of white bond paper 8½″ by 11″ in size. Margins should be 1½″ all around. Pages should be numbered, including title page. Begin each major section on a new sheet.

2. Computer disks: In order to speed publication and ensure accuracy, authors are requested to submit a computer disk containing the final version of their paper along with the final manuscript to the editorial office. Please do the following: (1) Use WordPerfect 6.0 software on either 3½″ or 5¼″ disk; (2) Specify what computer was used; (3) Include both original file and ASCII file on the disk; (4) Use single-spacing. All textual elements should begin flush left; (5) Keep a backup disk for reference and safety.

3. Style: For general style (grammar, capitalization, etc.) see *The Chicago Manual of Style*, 13th ed. (Chicago: University of Chicago Press, 1982). For spelling and hyphenation, see *Webster's Third New International Dictionary* or the *New Collegiate Dictionary*.

4. Title page: Manuscripts should begin with the title of the article, the author's name, the complete address from which the communication comes, and the corresponding author's E-mail Address. In the case of coauthors, respective addresses should be clearly indicated, as well as which author is to receive correspondence and proofs for corrections. The title should be concise and complete for easy indexing by abstracting services, and for later use with other bibliographic elements in automatic indexing.

5. Abstract: All papers must be supplied with an abstract on a separate page, preferably page 2, that will also be used in developing automatic indexing capability. The abstract should be no more than 150 words, concise, and complete in itself without reference to the body of the paper. Include purpose, methodology, results, and conclusions where applicable. Care should be taken to include up to five keywords suitable for indexing the article by computer analysis.

6. Text: Be sure that all references are cited in numerical order in the text and that all tables and figures are cited in the text, numbered according to the order in which they appear. Data in tables and figures should be summarized, not duplicated, in the text. All data in the text should be checked against the corresponding data in the tables and figures for agreement.

7. Tables: Tables should be typed on separate sheets of paper at the end of the manuscript, should be numbered consecutively, and should have informative titles. All tables should be cited in the text in numerical order.

8. Figures: All figures should be professionally drawn in black ink. Glossy, high-contrast black and white photographs are preferred. All figures should be cited in the text. As a general rule, most figures for reproduction should be at least 8″ by 10″ in size. Make sure that letters and numbers are clearly legible.

9. Figure legends: Figure legends, together with informative titles, should be typed double-spaced on a separate sheet of paper. Arabic numerals should be used.

10. References: References to published material should be identified in the text by arabic numerals in square brackets. References should be typed double-spaced at the end of the paper in numerical order. Authors are responsible for accuracy and completeness of references. Examples of the correct format are as follows:

Journal reference

1. Wilcox, Benton H. "Easy Access to U.S. Documents," *Wisconsin Library Bulletin*, 63 (March 1967), 87.

Book reference

2. Sinderman, Carl J. *Winning the Game that Scientists Play*. New York: Plenum, 1982.
3. White, Herbert S. "Strategies and Alternatives in Dealing with the Serials Management Budget," *Serials Collection Development: Choices and Strategies*, ed. Sul H. Lee. Ann Arbor, MI: Pierian Press, 1981, pp. 27–42.
4. The editor may be contacted for more examples of references and for instructions for the abstract.

Library Acquisitions: Practice & Theory

Editor: **CAROL PITTS HAWKS,**
Head, Acquisitions Dept., Ohio State University Libraries,
2129 Sandston Road, Columbus, OH 43220, USA

Library Acquisitions: Practice and Theory provides a forum for the exchange of ideas and experiences among members of the library acquisitions, collections management and bookselling communities throughout the world. It is a comprehensive publication designed to bring together many of the specializations within the broad areas of library acquisitions and collection management, including, but by no means limited to: books and serials in academia, public, school and special libraries, government publications; gifts and exchanges; microforms and other nonprint media, such as videodiscs and computer software; and pertinent library automation projects. In reflecting the broad practical and theoretical foundations of the discipline, **LAPT** presents on-the-job experiences of librarians and booksellers as well as more theoretical treatments.
